RICE MILL PLANT PROCESS FLOW CHART

RICE MILL PLANT PROCESS FLOW CHART

4.8Ton Line-A

Master of separating stones from brown rice and white rice

STONE SEPARATOR

Dolsoe(Home use)

Model : Dolsoe(Home use)
Capacity : 0.6ton/h

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

Dolsoe(Home use) completely eliminates stones and dusts

FEATURES

1. Excellent screening rate

Dolsoe is by far the best among its competitors in terms of screening small stones, metals, glasses and other foreign objects.

2. Air circulation method

Dust is settled while air is circulating inside the machine, so dust does not come out of it.

3. Free from mechanical trouble

Special bearings sealed up with lubricating grease applied to all rotating parts allow users to leave them with no oiling for a long time, and to be free from concerns about malfunction, noise and vibration.

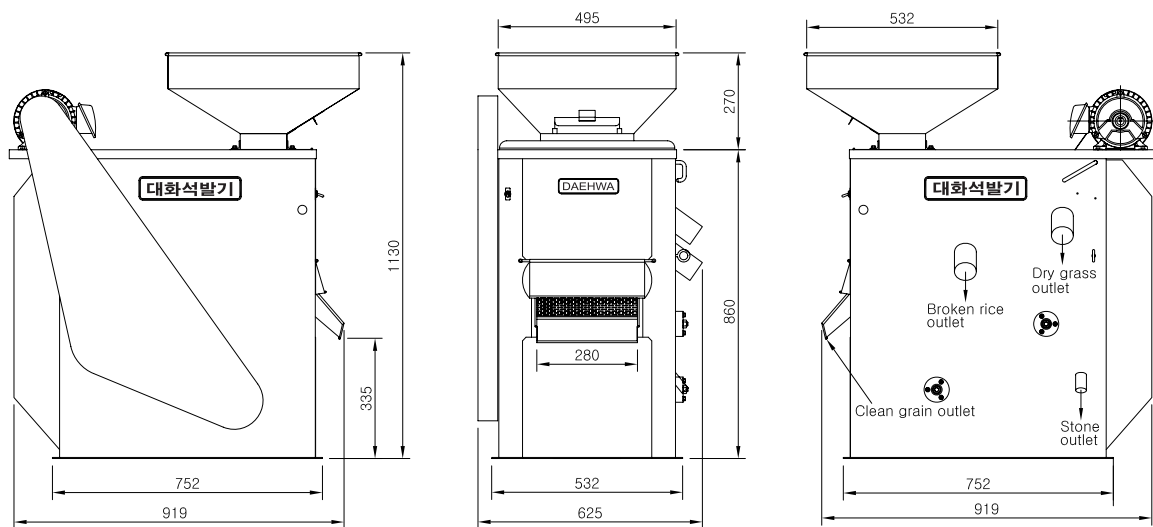

4. Built-in separator for dry grass and broken rice

Dolsoe is ideal for the primary cleaning where straw, PP-threads, bran, broken rice are eliminated.

● SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height	Weight
Stone Separator Dolsoe(Home use)	0.6ton/h	0.5hp	625mm	919mm	1130mm	85kg

Stone Separator Dolsoe(Home use)

STONE SEPARATOR

Dolsoe(Small)

Model : Dolsoe(Small)
Capacity : 2ton/h

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

Dolsoe(Small) completely eliminates stones and dusts

FEATURES

1. Excellent screening rate

Dolsoe is by far the best among its competitors in terms of screening small stones, metals, glasses and other foreign objects.

2. Air circulation method

Dust is settled while air is circulating inside the machine, so dust does not come out of it.

3. Free from mechanical trouble

Special bearings sealed up with lubricating grease applied to all rotating parts allow users to leave them with no oiling for a long time, and to be free from concerns about malfunction, noise and vibration.

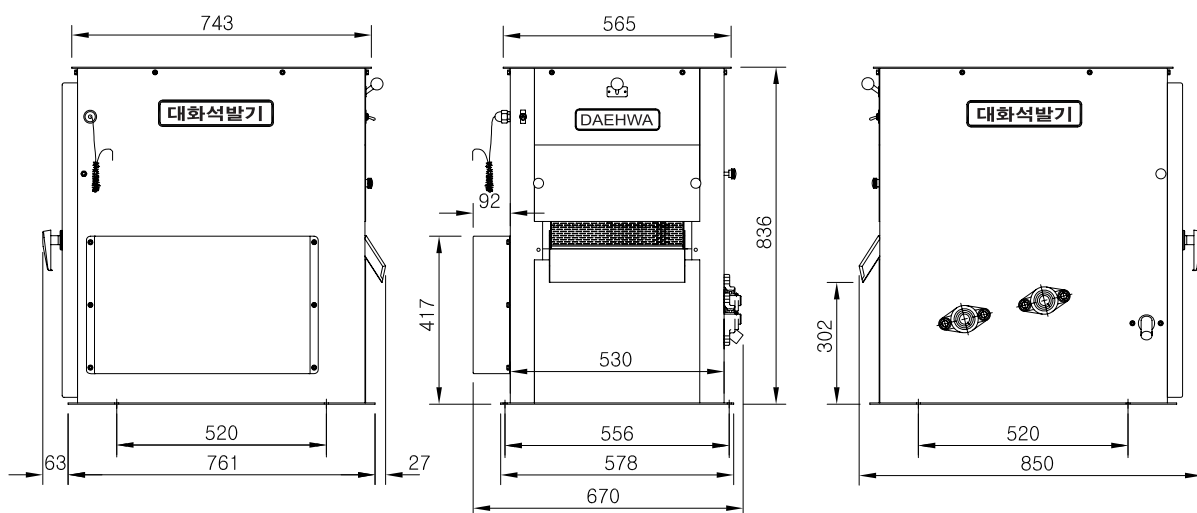

4. Ultra precise grinding axis

In order to maintain the accuracy of the rotating parts, the S45C grinding axis is adopted.

● SPECIFICATIONS

Master of separating stones from paddy rice

COMPREHENSIVE
STONE SEPARATOR

Dolsoe(ISPC-60)

Model : Dolsoe (ISPC-60)
Capacity : 6-7ton/h

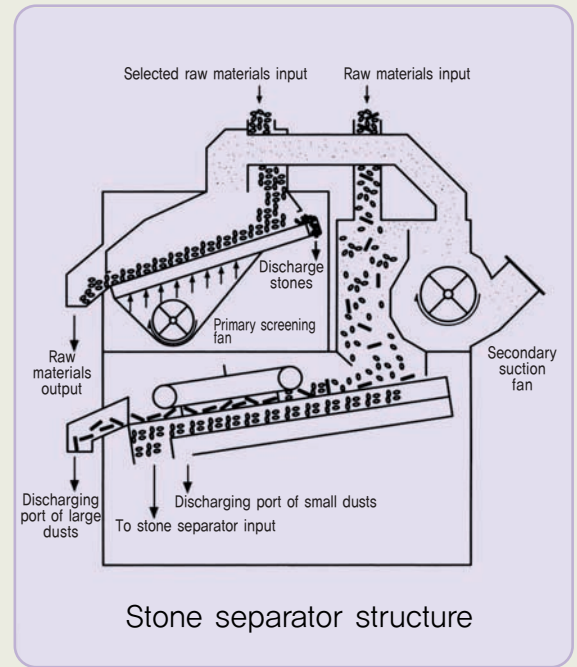

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

Dolsoe(ISPC-60) completely eliminates stones and dusts

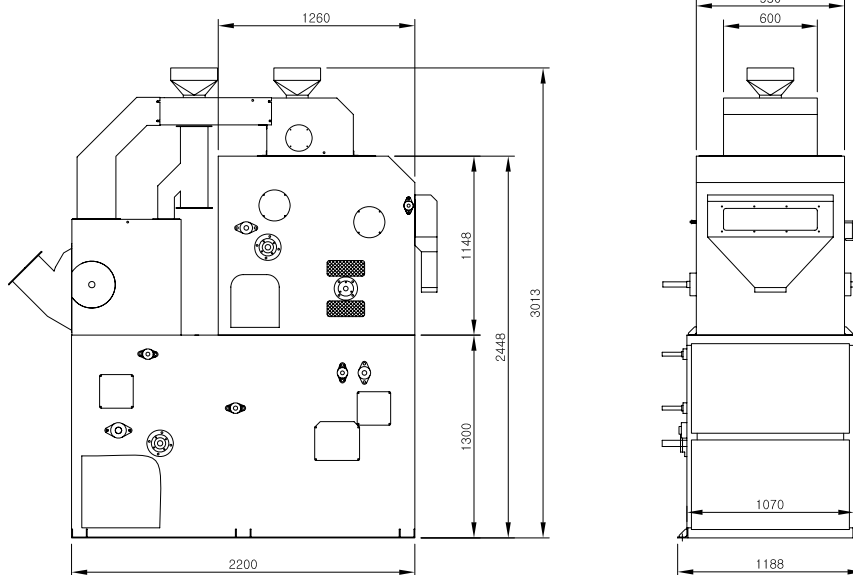

FEATURES

1. No need for a support when installing the stone separator.
2. Dolsoe(ISPC-60) adopts a method of floating and absorbing with a specially designed screen of an excellent screening capacity, low energy consumption and high efficiency.
3. The vacuum state inside the machine keeps it clean, and free from grains and dusts.
4. Excellent screen performance against dust and smut.
5. The screen mat and frame can be easily replaced. Grain does not leak through the stone outlet

● SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height
Stone Separator Dolsoe(ISPC-60)	6~7ton/h	10hp	1070mm	2200mm	3013mm

Super separator of brown rice

PADDY SEPARATOR

(Large 7-layer)

Model : Large 7-layer

Specialist in manufacturing equipment and facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

Super separator of brown rice

Large 7-layer
Capacity : 3.5~4.0ton/h Power : 2hp

Middle 3-layer
Capacity : 2.0ton/h Power : 0.5hp

FEATURES

1. Excellent screening rate

Brown rice and paddy rice are separating through the method of gravity and coefficient of friction.

2. Easy observation on separating process

Separating process on the screening board can be observed at a glance.

3. Superior durability

Special bearings sealed up with lubricating grease applied to all rotating parts allow users to leave them with no oiling for a long time, and to be free from concerns about malfunction, noise and vibration.

SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height
Paddy separator Large 7-layer	3.5~4ton/h	2hp	1,830mm	1,550mm	2,010mm
Paddy separator Large 5-layer	3.0ton/h	2hp	1,830mm	1,550mm	1,900mm
Paddy separator Middle 4-layer(Auto)	2.5ton/h	1hp	1,800mm	1,140mm	1,750mm
Paddy separator Middle 3-layer(Auto)	2.0ton/h	0.5hp	1,800mm	1,140mm	1,680mm

Super separator of brown rice

PADDY SEPARATOR

ISPS-35

Model : ISPS-35
Capacity : 3.5-4ton/h

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHW A INDUSTRIAL MACHINERY CO., LTD.

Super separator of brown rice

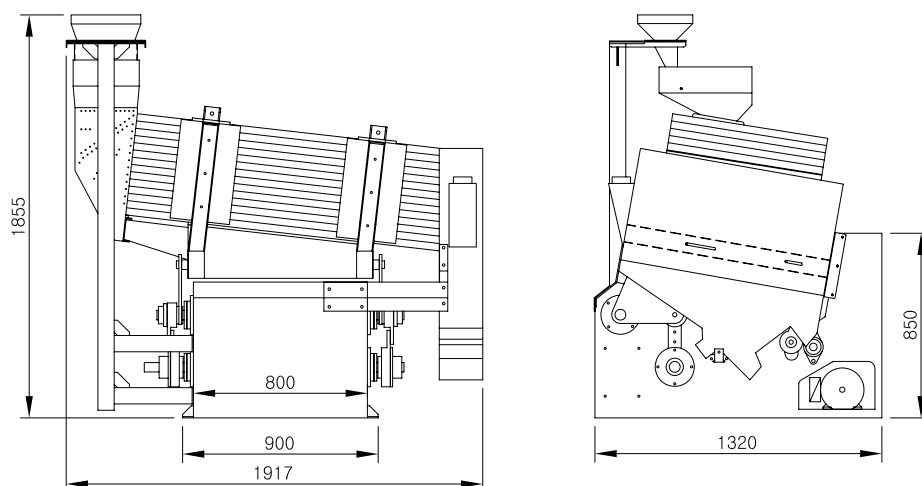

FEATURES

1. Compact size doesn't require large space.
2. Separate input into each screening board prevents clogging, and increases accurate separation.
3. Using a special screening board enhances separation capacity and prevents debris from sticking to the screening board, which does not require frequent cleaning.
4. The angle of the screening board can be adjusted during operation.
5. Precise separation can minimize the chance of returning unpolished rice, and increase yield rate, which extends the life of the machine.
6. Automatic stopping device increases operators' convenience. (Optional)

◎ SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height	비 고
Paddy Separator ISPS-35	3.5~4ton/h	2hp	2040mm	1320mm	1855mm	14-layer
Paddy Separator ISPS-30	3~3.5ton/h	2hp	1881mm	1320mm	1790mm	12-layer

Definitive solution for eliminating broken rice and green-kerneled rice

BROKEN RICE SEPARATOR

(Swaedori)

Model : Swaedori
Capacity : 3.5ton/h

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

Swaedori completely eliminates broken rice and green-kerneled rice

FEATURES

1. Excellent screening rate

2. 2-step screening method

Swaedori is ideal for the primary cleaning. On the first step, straw, PP-threads, bran are eliminated, and the second, green kenneled rice and broken rice.

3. Easy to alternate the screen

Flexible using of the screens makes it easy to separate all sizes of broken rice.

4. Free from mechanical trouble

Special bearings sealed up with lubricating grease are applied to all rotating parts allow users to leave them with no oiling for a long time, and to be free from concerns about malfunction, noise and vibration.

5. Built-in screen cleaning ball

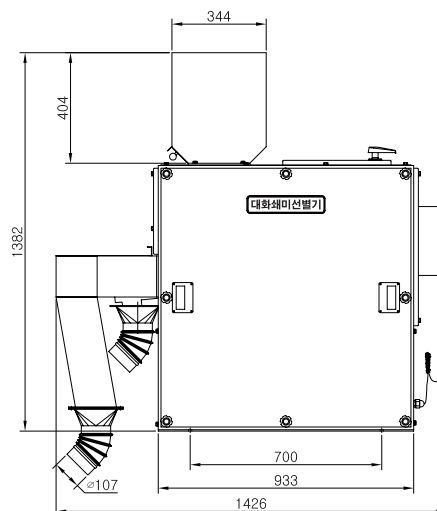

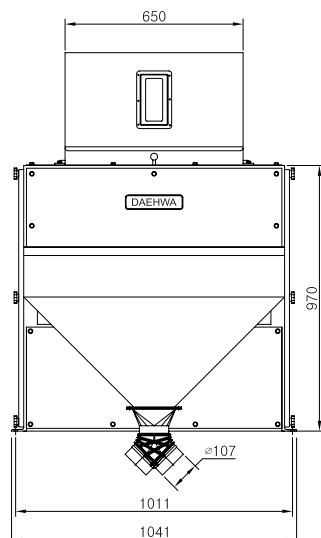

Silicon cleaning ball inserted automatically maintains the cleanliness of the screen.

Model : Swaedori
Capacity : 3.5ton/h

● SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height	Weight
Broken Rice Separator Swaedori	3.5ton/h	0.5hp	1041mm	1426mm	1382mm	350kg

Broken Rice Separator(Swaedori)

● Specifications are subject to change without notice for better performance.

Definitive solution for eliminating broken rice and green-kerneled rice

GREEN-KERNELED RICE SEPARATOR

(SS30)

Model : SS30
Capacity : 3.0ton/h

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing
DAEHWAL INDUSTRIAL MACHINERY CO., LTD.

SS30 completely eliminates broken rice and green-kerneled rice

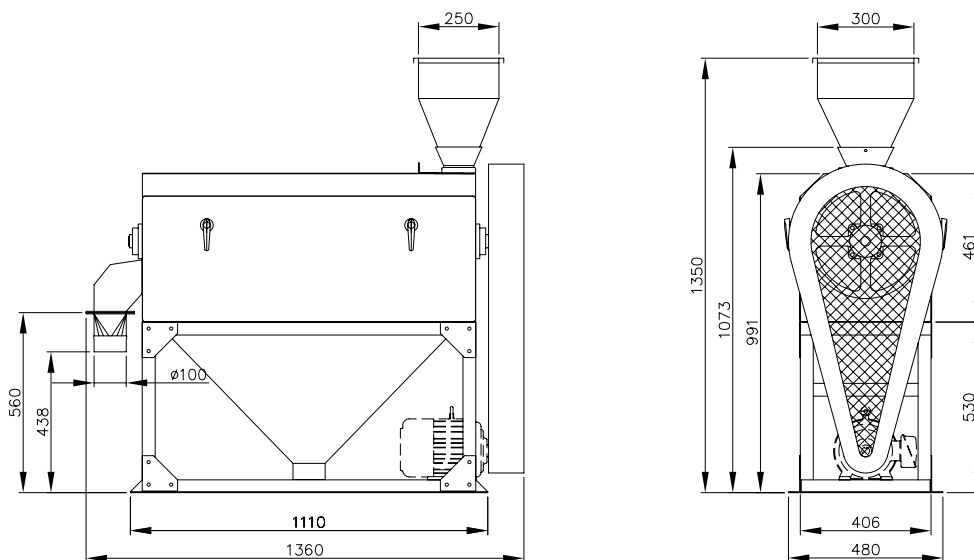

FEATURES

1. Excellent screening rate
2. Slow-roll discharge avoids shock to grain.
3. Completely eliminates broken rice and green kenneled rice.
4. Easy to alternate the screen
Flexible using of the screens makes it easy to separate all sizes of broken rice.
5. Free from mechanical trouble
Special bearings sealed up with lubricating grease applied to all rotating parts allow users to leave them with no oiling for a long time, and to be free from concerns about malfunction, noise and vibration.

● SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height
Green-kerneled Rice Separator(SS30)	3.0ton/h	3hp	480mm	1360mm	1350mm
Green-kerneled Rice Separator(SS60)	6.0ton/h	5hp	667mm	1399mm	1450mm

Green-Kerneled Rice Separator (SS30)

● Specifications are subject to change without notice for better performance.

Definitive solution for eliminating broken rice and green-kerneled rice

BROKEN RICE SEPARATOR

(Middle)

Model : Middle

Specialist in manufacturing equipment and facilities for drying, polishing, and food processing

DAEHWAL INDUSTRIAL MACHINERY CO., LTD.

Broken rice separator completely eliminates broken rice and green-kerneled rice

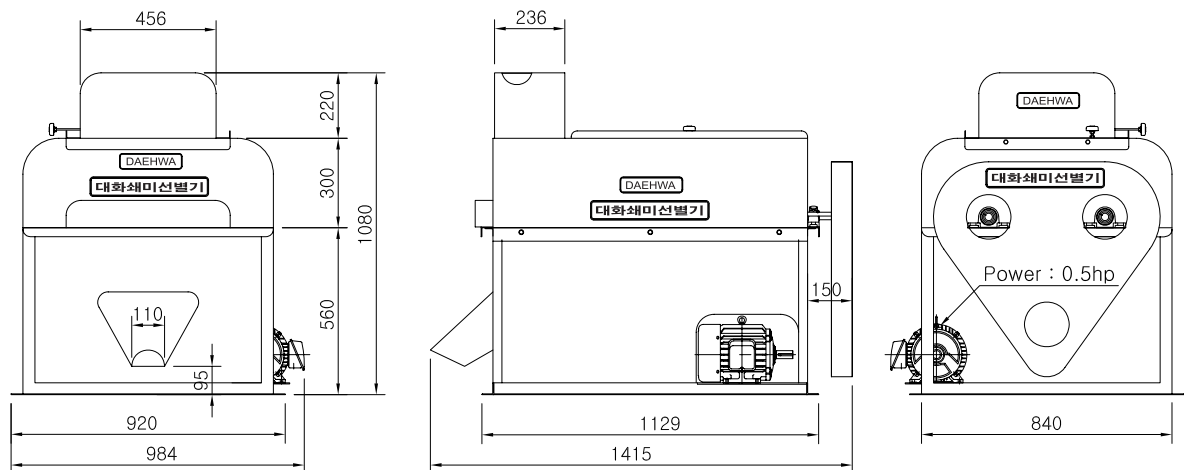

FEATURES

1. Slow-roll discharge avoids shock to the rice.
2. Superior screening capacity to the one with punched sieve.
3. Screen with a mesh space of 0.05mm can screen any size of grain.
4. Low speed revolution of 48-50r.p.m ensures long durability.
5. Specially designed brush increases efficiency, and prevents grain from being caught.

● SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height
Broken Rice Separator(Middle)	3ton/h	0.5hp	1415mm	984mm	1080mm

Broken Rice Separator (Middle)

Definitive solution for eliminating broken rice and green-kerneled rice

VIBRATORY SEPARATOR

(Middle)

Model : Middle
Capacity : 3.5ton/h

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing
DAEHW A INDUSTRIAL MACHINERY CO., LTD.

Vibratory separator completely eliminates broken rice and green-kerneled rice

FEATURES

1. Excellent screening rate

Vibratory separator is by far the best among its competitors in terms of screening small stones, metals, glasses and other foreign objects.

2. 2-step screening method

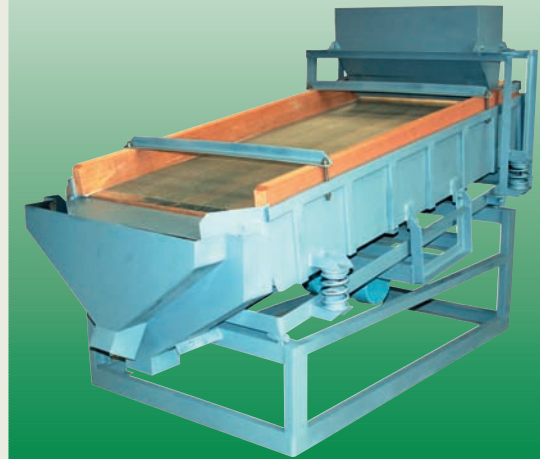

Vibratory separator is ideal for the primary cleaning. On the first step, straw, PP-threads, bran are eliminated, and the second, green-kerneled rice and broken rice.

3. Easy to alternate the screen

Flexible using of the screens makes it easy to separate all sizes of broken rice.

4. Free from mechanical trouble

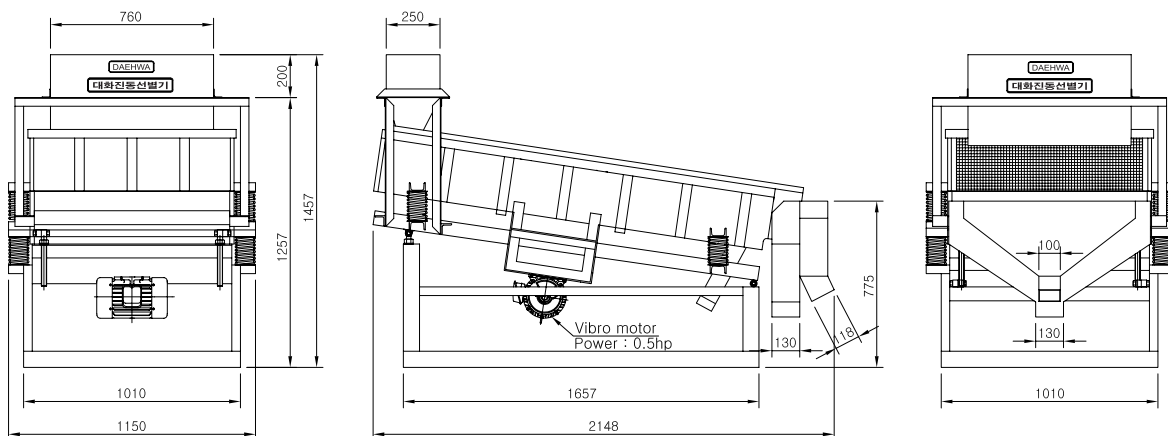

Vibratory separator is operated by a vibrating motor, so it is free from mechanical trouble, noise, and vibration.

Model : Middle
Capacity : 3.5ton/h

● SPECIFICATIONS

Model	Capacity	Power	Width	Length	Height
Vibratory Separator(Middle)	3.5ton/h	0.5hp	2148mm	1150mm	1457mm

Master of screening raw materials

PRE-CLEANER

(SCS4019)

Model : SCS4019
Capacity : 20ton/h

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWAL INDUSTRIAL MACHINERY CO., LTD.

Master of separating sand, smut, straws and empty heads of grain

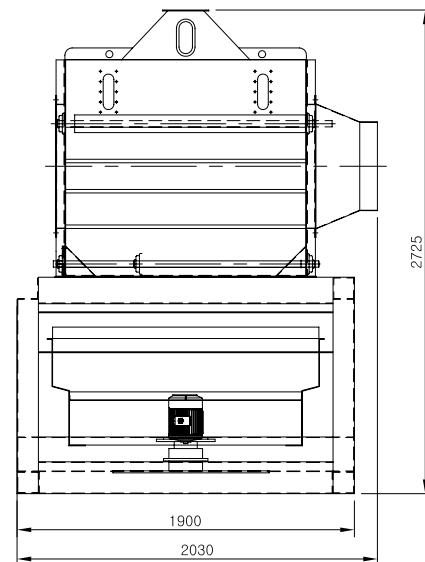

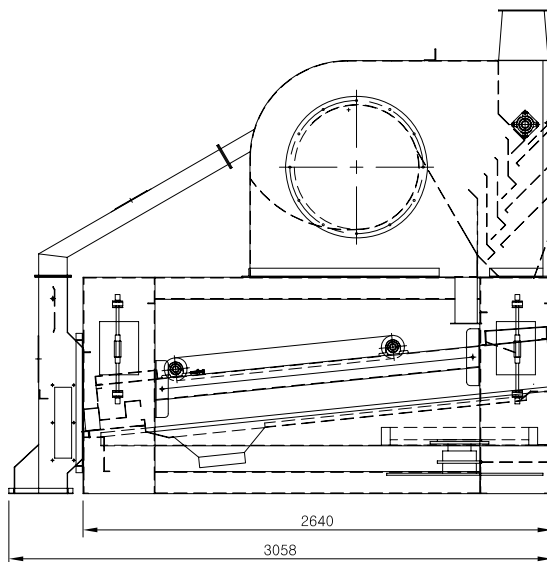

FEATURES

1. Capable of processing large quantity regardless of the types of mixture or moisture.
2. Requires small space to set it up
3. Segments the separating process into 3 steps
4. Simplified replacement of the screen
5. Maximized yield through removing smut and dusts
6. Maximized efficiency (Excellent screening performance)
7. Specially designed to eliminate vibration and noise as well as to perform excellent aspiration
8. Three-step-aspiration device
9. Built-in scraper to clean up straws

● SPECIFICATIONS

Model	Capacity(t/h)	Power(HP)	Width	Length	Height
Pre-Cleaner SCS4019	20ton/h(with 24% of moisture)	2hp, 1/2hp, 1/4hp	2640mm	1950mm	2590mm

Pre Cleaner (SS4019)

Definitive solution for processing and producing clean rice

DAEHWA RICE POLISHER_(SHINER)

BCPWJ-2400

간조, 도정, 식품기계 제조설비 전문업체
대 화 산 업 기 계

Model : BCPWJ-2400
Capacity : 2-2.6ton/h

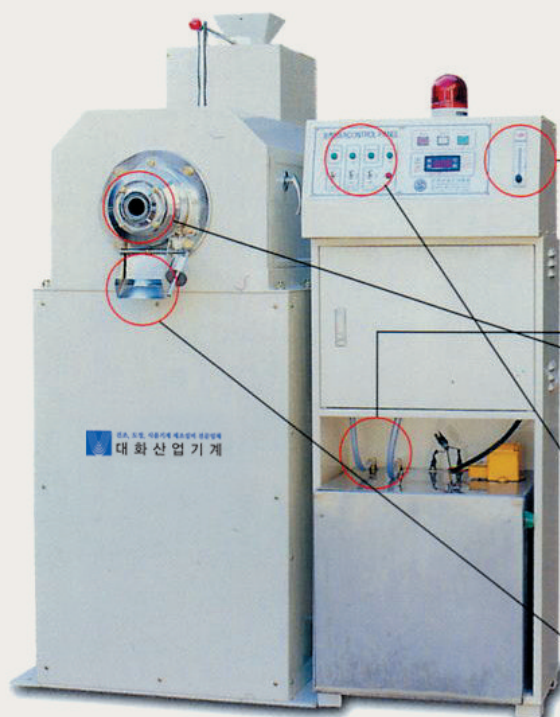

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

Definitive resolution for processing and producing clean rice

Daehwa Rice Polisher(Shiner)

FEATURES

BCPWJ-2400

- Micro-quantity adjustment**
 Daehwa Rice Polisher supplies the same amount of water constantly due to the precise micro-quantity adjustment function, so desired quality of rice is produced.
- Perfect frost protection**
 Flexibly adjustable water temperature function prevents the water tank and the nozzles from frozen burst.
- Parts with long durability**
 Quality materials are used for the main parts and auto-controlling high pressure pumps are operated by the close examination of sensors throughout the whole process, which allows easy-to-use operation and long durability.
- Convenient device**
 Automatic control operations provide superior convenience and safety.
- Producing grain with crystal-clear surface**
 Daehwa Rice Polisher processes the surface of grains like glittering crystal, so that the quality and the shelf life of rice may be enhanced.

MIDAS PLUS SERIES COLOR SORTER

MidasPlus-6

Model : MidasPlus-6

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing
DAEHWA INDUSTRIAL MACHINERY CO., LTD.

MIDAS PLUS SERIES

FEATURES

1. REALIZATION OF FULL AUTOMATION SYSTEM

- Easily accessible DIGITAL LCD TOUCH SCREEN with MICRO-PROCESSOR had been equipped.
- MULTI-SORTER FUNCTION had been adopted which provides automatic separation of raw material by the automatic color adjustment system.

2. THE BEST SUITED CHUTES

- Custom-Made Chutes will be provided depending on the characteristics of raw materials of the user.
- The surface of the chute is specially coated and heater attached to less the dispersion of raw material regardless of surrounding temperatures that could possibly occur by the friction when the raw material slides down. This special chute will definitely maximize the productivity and will increase the profit of the user.

3. Application of a NEW Concept of Light Source(LED)

This is another pride of us and is newly introduced to the world by us only.

For the MIDAS PLUS SERIES, a sensationally advanced light resource has been applied which is called LED(Light Emitting Diode)light source. It will provide:

- 1) Satisfactory sorting result by stable intensity of illumination
- 2) Over 50,000 hours(Semi-permanent) of life period(No need to replace them periodically like the existing types-ex:fluorescent lamps)
- 3) Realization of various light colors
- 4) Free from the affects of the surrounding temperatures that used to cause the trouble of light brightness

Color Sorter with CCD sensor and digital camera

COLOR SORTER

BCS128

Model : BCS128

Specialist in manufacturing equipment and facilities for drying, polishing, and food processing

DAEHWI INDUSTRIAL MACHINERY CO., LTD.

Color Sorter with a CCD sensor and a digital camera

FEATURES

1. Adopting high-sensitive sensor,
Color sorter senses even the finest materials.
2. Ultra high-speed ejector made by special
material screens fine color particles
without missing.
3. Color sorter is easy to operate because it
is controlled via a touch screen, and the
whole process is graphically displayed.
4. Color sorter provides dozens of programed
modes in which preferable ones picked
depending on objects.

The first color sorter for beans in Korea

COLOR SORTER

MPS70DW

Model : MPS70DW

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHW A INDUSTRIAL MACHINERY CO., LTD.

The first color sorter for beans in Korea

FEATURES

1. Grain is conveyed on a belt without being broken or cracked.
2. Grain is conveyed at the same speed so even the fine color particles are screened without missing.
3. Special screening technology are installed that scraps, stones and immature beans sorts out with out missing.
4. Hulls and small dusts are effectively eliminated.
5. The rotating speed of the engine is automatically adjusted depending on the shapes of grain.
6. Operation mode is easily selected depending on the type of grain.

SPECIFICATIONS

Model	Channels	Power(AC220V50/60Hz)		Capacity ton/h	Dimension(mm)		
		Main(max)	Compressor		Length	Width	Height

AUTOMATIC WEIGHING MACHINE

HK-2000(Double-gate type)

Model : HK-2000
(Double-gate type)

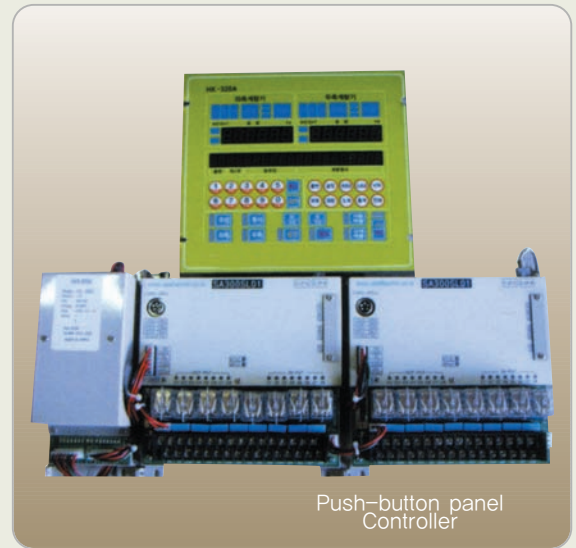

Specialist in manufacturing equipment and facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

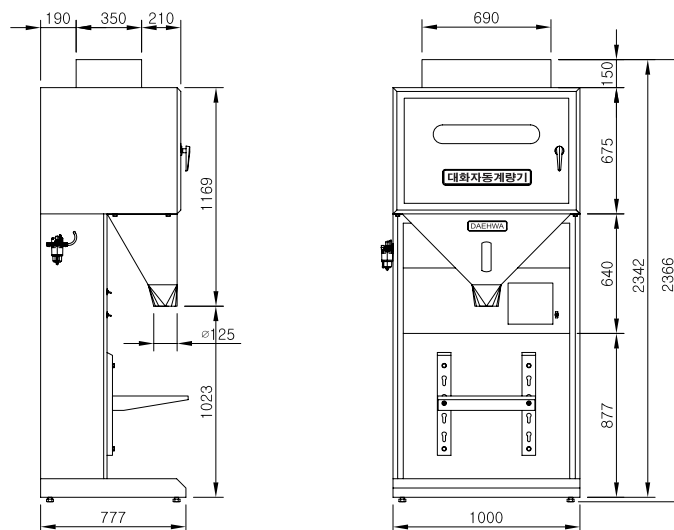

HK-2000(Double-gate type) Completely eliminates errors caused by auto-measurement

FEATURES

1. Equipped with a special control unit for measurement, HK-2000 is operated by single-touch system. Information is displayed in the load-cell method.
2. Speed control device is operated, using the air-cylinder method.
3. There are three steps in the whole process of measuring the amount of rice. HK-2000 supplies rice with large, medium, and small quantity depending on the desired amount, which allows the precise measurement and speed/force adjustment.

Type	Model	HK-1000(Single)	HK-2000(Double)	HK-3000(Triple)

DPS-2	Appx 700~800 bags/hour	50g~5kg	1g~2g	860×860×2200
DPS-3	Appx 1000 bags/hour	50g~5kg	1g~2g	1010×860×2300

Auto Measuring / Packing Machine (DPS-1)

● Specifications are subject to change without notice for better performance.

Specialist in manufacturing equipment and facilities for drying, polishing, and food processing

DAEHW INDUSTRIAL MACHINERY CO., LTD.

Factory: 18-8, Deogam-dong, Daedeok-gu, Daejeon, Korea
Tel : +82-42-931-0609 / Fax : +82-42-931-6609
<http://www.daehwamc.kr> <http://www.daehwamc.com>

Definitive solution for automatic measuring and packing

AUTO MEASURING/PACKING MACHINE

(DPS-1) & Vacuum-transfer device

Model : (DPS-1) &
Vacuum-transfer device

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

DPS-1 completely eliminates errors caused by auto-measurement and packing

FEATURES

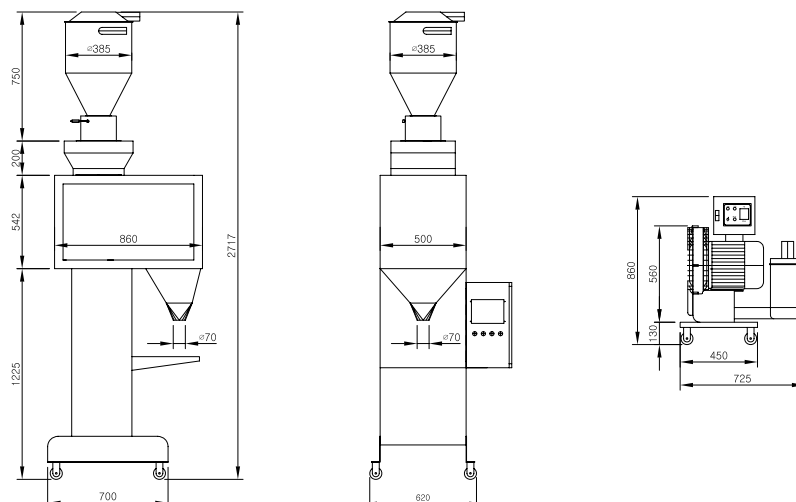

1. DPS-1 is able to measure a variety of sort of grain.
2. Interactive computer system increases users' convenience.
3. Various selection modes are installed for better convenience.
4. Three streamlining control system provides large, medium, and small quantity modes.
5. System recovery and data protection functions are provided.
6. Users are able to measure :
rice, miscellaneous cereals, corns, medicine and other articles.

Model : (DPS-1) & Vacuum-transfer device

● SPECIFICATIONS

Model	Measuring speed	Measuring range of packing	Minimum scale	Dimension
DPS-1	Appx 300 bags/hour	50g~5kg	1g~2g	550×860×2100
DPS-2	Appx 700~800 bags/hour	50g~5kg	1g~2g	860×860×2200
DPS-3	Appx 1000 bags/hour	50g~5kg	1g~2g	1010×860×2300

Auto Measuring / Packing Machine
(DPS-1 & Vacuum transfer device)

Definitive solution for auto measuring and packing

AUTOMATIC WEIGHING/PACKING MACHINE

SJ-200A-1

Model :
SJ-200A-1

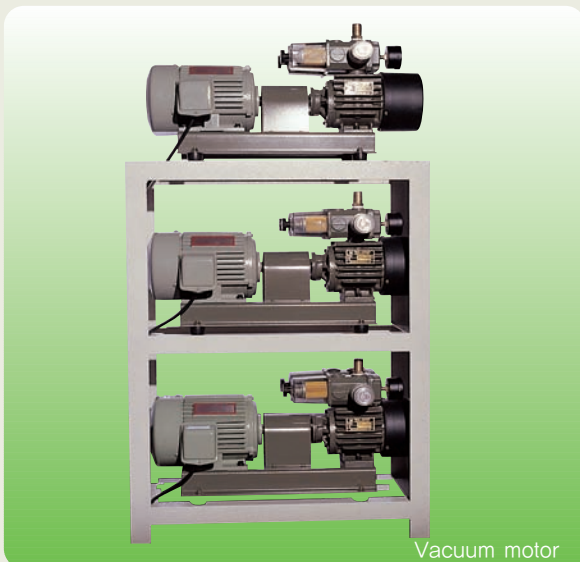

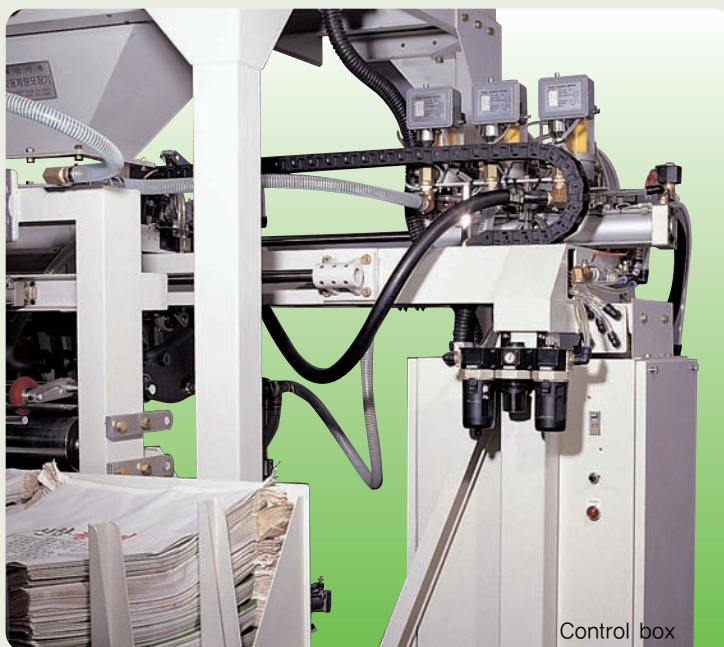

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

SJ-200A-1 completely eliminates errors caused by auto-measurement and packing

FEATURES

1. Touch screen allows even a novice to operate it with ease.
2. For converting the 10kg system to the 20kg, the whole system of scales converts within one second.
3. The upper part of a paper bag is sewed without cutting, which allows tidy packing.
4. The maximum output speed is 650bags/hour.
5. Desired amount of packing can be set before processing. When the desired amount is processed, SJ-200A-1 automatically stops.
6. Automatic measurement indicator is installed for ultra-precise measurement.
7. SJ-200A-1 includes many detection devices: if no bag is left, a bag is placed in a wrong way, or a bag is closed, SJ-200A-1 blows out the bag, or turns the emergency stop device to be in action.

Model	SJ-2001-1
Capacity	500-600 bag/hr
Measuring way	Three-stage control
Measuring range of packing(kg)	8, 10, 20, 25
Air compressor	15hp(11kw)Optional
Voltage	220~380V 6.0kw
Object materials	Rice, fertilizers and feeding stuff

● Specifications are subject to change without notice for better performance.

Definitive solution for automatic sewing

AUTOMATIC SEWING MACHINE

SJ-50A-1

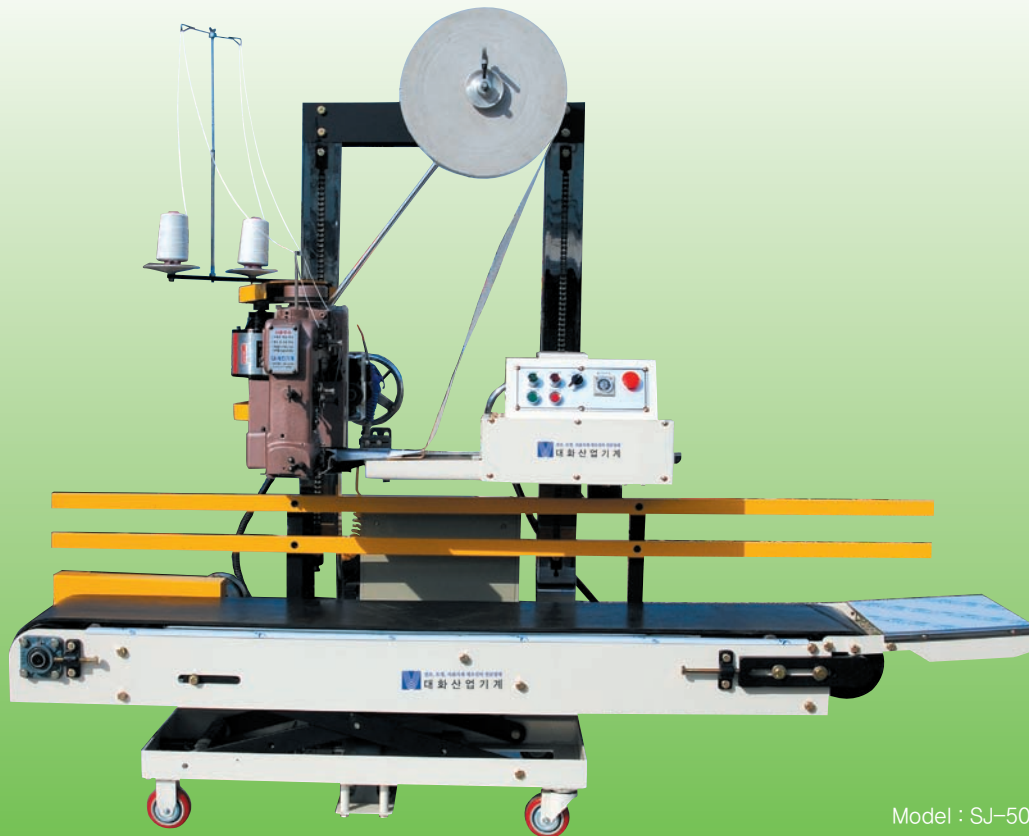

Model : SJ-50A-1

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing

DAEHWA INDUSTRIAL MACHINERY CO., LTD.

SJ-50A-1 completely eliminates defective sewing after measurement

Model : SJ-50A-1

FEATURES

1. SJ-50A-1 complements the shortcomings of the existing sewing machine. SJ-50A-1 requires only one operator to sew a bag of 10~20kg, so even a novice can operate it.
2. The seal of main operating parts is airtight, so SJ-50A-1 is free from contamination and dusts.
3. SJ-50A-1 starts and stops itself, and automatically cuts adhesive tapes and sewing threads.
4. The conveyor of the sewing machine is adjusted automatically, so the conversion of packing units(10kg~20kg) can be done promptly.

Capacity	350~400bag/hr
Stitch	7~12mm
Voltage	220~380V 1.5kw
Dimension(mm)	1600×2300×650

◎ Specifications are subject to change without notice for better performance.

SJ-DS-6B

Model : SJ-DS-6B

Specialist in manufacturing equipment and
facilities for drying, polishing, and food processing
DAEHW A INDUSTRIAL MACHINERY CO., LTD.

SJ-DS-6B completely eliminates defective sewing after measurement

Model : SJ-DS-6B

FEATURES

1. SJ-DS-6B complements the shortcomings of the existing sewing machine dramatically. SJ-DS-6B requires only one operator to sew a rice bag of 10-20kg, so even a novice is able to operate it.
2. The seal of main operating parts is airtight, so SJ-DS-6B is free from contamination and dusts.
3. SJ-DS-6B starts and stops itself, and automatically cuts adhesive tapes and sewing threads.

Capacity	600~700bag/hr
Stitch	7~12mm
Voltage	220~380V 1kw
Dimension(mm)	1600×2300×650

After milling equipment commemorative photo

A graphic of a globe with a large green tree in the center. The globe shows continents and oceans. The tree is positioned in the middle of the globe, with its roots in the southern hemisphere and its canopy reaching towards the top. The globe is surrounded by three white elliptical orbits, each with a bright star-like point, suggesting a celestial or orbital theme. The background is a solid blue color.
